2nd Asia Pacific Echocardiography Course on Congenital Heart Disease: Basic to Advanced Imaging
Bandung (Indonesia) • July 5th - 7th 2024

This comprehensive course offers physicians, trainees and sonographers a basic-to-advanced overview of imaging and morphology in congenital heart disease, with talks from an international panel of experts in this field. The course covers the imaging-pathological correlation of congenital heart defects applicable to best clinical practice and research.

The course outline will cover:

- Introduction to segmental sequential analysis for description of congenital heart diseases in children and young adults
- Cardiac morphology and echocardiography correlations in congenital heart diseases
- Echocardiographic guidance to transcatheter and surgical treatment of heart conditions
- Role of echocardiography in the assessment of neonates and small infants with large variety of heart conditions and circulatory problems
- Live scanning sessions with experts
